Ispra folding stacking chair

Ispra is a STRONG 11 pound bi-component structural resin folding chair, which folds perfectly flat to 2 3/4". Guaranteed resistant to all weather conditions and UV rays, it is easily cleaned using water and a neutral liquid detergent. Ideal for any outdoor dining area.

Easy to handle, low maintenance, stacking and interlocking.

Available in White and Hunter Green.

Ispra linking armrest

One or more chairs can be aligned and linked with our linking armrest.

Snap in - snap out no tools required.

Seat dim.: 15"x16"
Seat height: 17"
Weight: 11 lbs.

Bi-component resin is a recyclable material.

Ispra meets and exceeds the standards set forth in ISO 7173, ANSI/BIFMA X5.1-1993 and ANSI/BIFMA X5.4-1997. The product specifically will meet or exceed the 225 lbs. functional load as well as the 300 lbs. proof load requirements of the test.

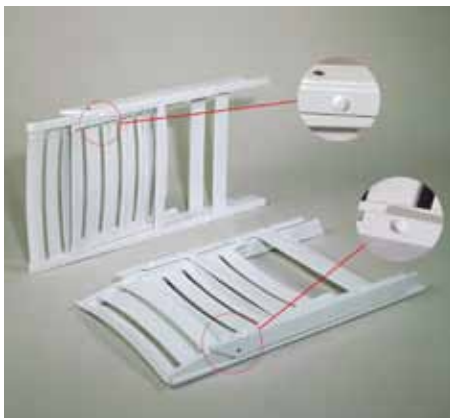

Material

Structural bi-component resin is formed with two materials:

- A- a modified aesthetic compact resin
- B- a modified resin with expanded closed cells, with extreme absorbing properties against movement.

The compact material of the outer surface highlights the aesthetic appeal as resisting U.V. rays, extreme heat, cold, water, humidity and every day use. The expanded closed cell material on the inside has the ability to withstand stress, tension and unavoidable movements during use. The structural bi-component resin remains undistorted, insuring maximum resistance from both materials.

Made in Italy

Each chair has 4 locking buttons for easy stacking.

Samples are shipped 2 chairs per box.

We ship 25 Ispra chairs on a resin base which can be easily handled with a handtruck or a palletjack. Stack Dim.: 18" x 35" x 71"h

Four legs can be attached to the base for convenient palletizing.

Four casters may be used to convert the resin base into an easy move around Ispra dolly.
